

**ABSTRACT OF THE DISCLOSURE**

5 A casino-style wagering game is disclosed. The method includes the steps of placing a first multiple-part bet to participate in a first poker game against a pay table with predetermined winning outcomes and payout odds. Players may place an optional side bet to play a second poker-type game against a separate pay table, using a partial hand of cards dealt to each player. After the side bet game is resolved against the side bet pay table, additional cards are provided and the base game is then resolved against the base game pay table.
